PROFILE

Python and Full-Stack Developer with a strong frontend foundation, focused on building responsive, modern web interfaces with clean, maintainable code. Former Co-Founder & CTO of AperaBoost and former Co-Founder of Markaaf Studio, having led technical direction for client web products at both. Comfortable shipping end-to-end — from UI implementation to Python-based backend and scripting work.

EXPERIENCE

Former Co-Founder & CTO — AperaBoost

- Led the technical direction of AperaBoost, shaping how the team built and shipped web products for clients.
- Delivered full business and marketing websites — from UI implementation to deployment.

Former Co-Founder — Markaaf Studio

Past role

- Co-founded Markaaf Studio and helped build with a strong product mindset alongside a growing team, before shifting full-time focus to AperaBoost.

Freelance Frontend Developer — Client Projects

Ongoing

- Built and shipped 14+ live websites for clients, spanning business sites, restaurant/food brand pages, an educational academy site, and interactive front-end tools.

Frontend Developer Intern — Internee.pk

2-Month Virtual Internship — Certificate on file

- Completed a structured virtual internship applying HTML, CSS and JavaScript fundamentals to real front-end tasks.

SELECTED PROJECTS

- AYAN HARDWARE — Premium business website for a UPVC hardware supplier — live catalog, reviews, and an admin dashboard.
- Multiple Step Form — Multi-step form experience optimized for conversion flow and responsive validation.
- LetMeServe — Local services marketplace where customers can find, book, and manage local service providers.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6), TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap

Full-Stack Development: Full-Stack Web Development

Programming: Python (Full-Stack & Scripting)
